

The FAA Safety Team presents:

# Loss of Control!

Stall/spin accidents tend to be more deadly than other types of GA accidents, accounting for about 10 percent of all accidents, but 13.7 percent of fatal accidents! You may be surprised about what you don't know regarding the aerodynamics of stalls and spins! Do you know the 4 phases of a spin? Or, how to recover from an inverted spin? Be aware and avoid becoming a statistic of the "Loss of Control" accident. In this meeting featured speaker David Windmiller will refresh your knowledge of stalls and spins, and provide you with the tools you need to recognize, avoid and recover from these maneuvers. Click on the link below to register for this exclusive briefing and find out about another special event at nearby Brookhaven Airport (KHWV)!

**Directions:** The entrance to Bayport Aerodrome Society (BAS) is off Nichols Road. From Sunrise Highway, proceed South on Nichols Road (RTE97) and turn right at the first light onto Church Street. Make next left onto Vitamin Drive and follow the signs to the (BAS) parking lot. North from Montauk Highway make a left at the second light and proceed as above.

**A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
